AGRICULTURAL STATISTICS, IRELAND, 1905.

THE EXTENT IN STATUTE ACRES AND THE PRODUCE OF THE CROPS.

TO THE

SECRETARY OF THE DEPARTMENT OF AGRICULTURE
AND TECHNICAL INSTRUCTION FOR IRELAND.

SIR,

I have the honour to submit the accompanying Tables relating to the Extent in Statute Acres and the Produce of Crops in Ireland in the year 1905. The Tables showing the acreage under crops, which were submitted in an unrevised form in August last, have since been carefully revised. The estimated rates of produce and yield of the several crops are shown for Ireland by Counties and Poor Law Unions.

The question of the estimates of the yields of crops is at present under investigation, and extensive inquiries have been made. It is not yet, however, possible to present the results of these inquiries, but the question will be dealt with in the Detailed Report on Agricultural Statistics.

ACREAGE UNDER CROPS.

Compared with 1904 there was in 1905 an increase of 7,035 acres, or 22·8 per cent., in the area under wheat; of 741 acres, or 7·9 per cent., under rye; and of 68 acres, or 36·8 per cent., under peas; while there was a decrease of 11,966 acres, or 1·1 per cent., under oats; of 3,454 acres, or 2·2 per cent., under barley; of 4 acres, or 6·7 per cent., under bere; and of 419 acres, or 22·2 per cent., under beans. There was thus a net decrease of 7,999 acres in the area under cereal crops.

The area under beet root has increased by 45 acres, or 54·9 per cent.; parsnips by 9 acres, or 1·5 per cent.;
Green Crops. cabbage by 3,030 acres, or 7·6 per cent.;
and other green crops by 532 acres, or 2·5 per cent. The area under potatoes has decreased by 1,785 acres, or 0·3 per cent.; that under turnips by 3,726 acres, or 1·3 per cent.; mangel wurzel by 3,176, or 4·2 per cent.; carrots by 363, or 17·2 per cent.; vetches by 195, or 7·1 per cent.; and rape by 481, or 13·8 per cent. There was thus a net decrease of 6,110 acres in the area under green crops.

The area under flax in 1904 was 44,293 acres; the area returned under this crop in 1905 was 46,158 acres, being an increase of 1,865 acres, or 4·2 per cent.

The area for Hay as land under rotation in 1904 was 681,748 acres; this year it is 628,635 acres, being a decrease of 53,113, or 0.5 per cent. The area under Hay on Permanent Pasture in 1904 was 1,628,412 acres, and in 1905 it is 1,665,871, showing an increase of 37,459 acres, or 2.3 per cent. There is, therefore, a net increase of 34,346 acres in the total area under meadow and clover.

ACREAGE UNDER GRASS.

In the returns the area for Grass (not for Hay) is subdivided under the headings "Clover, Sainfoin, and Grasses under Rotation," and "Permanent Pasture, or Grass *not broken up in rotation.*" The area for grass under "Clover, &c.," in 1904 was 647,416 acres; this year it is 626,478, being a decrease of 20,938 acres, or 3.2 per cent. The area for grass on "Permanent Pasture, &c.," in 1904 was 9,939,223 acres; in 1905 it is 9,971,518, being an increase of 32,295 acres, or 0.3 per cent. There is, therefore, a net increase of 11,357 acres in the total area under grass.

TABLE showing the average yearly Extent of Land under the principal Crops and Grass (not for Hay) in the ten years 1895-1904; the extent in 1904 and 1905 respectively; the Increase or Decrease in the extent under each crop in 1905 compared with 1904; and the extent in 1905 above or below the average for the ten years 1895-1904.

	Rate per cent.	49.7	74.6	97.5	31.8	52.5	37.2	23.1	222.2

Coming to the question of the rates of produce per acre of the crops, we find, on comparison with those of 1904, that the rate for wheat rose from 18.1 cwts. to 20.2 cwts.; for oats from 15.9 to 16.3 cwts.; for barley from 14.9 to 19.9 cwts.; for rye from 13.0 to 13.5 cwts.; for potatoes from 4.8 to 5.6 tons; and for flax from 33.7 to 37.7 stones. The rate for mangel wurzel remained the same, namely, 17.6 tons; the rate for bere fall from 14.5 to 14.1 cwts.; for turnips from 17.5 to 16.7 tons; for beet root from 17.4 to 13.5 tons; for clover, sainfoin and grasses under rotation from 2.3 to 2.2 tons; and for permanent pasture or grass not broken up in rotation from 2.5 to 2.4 tons.

Comparing the average rates of produce per acre in 1905 with the mean rates for the 10 years 1895-1904, we find the following increases in 1905:—Wheat from 17.5 to 20.2 cwts.; oats from 15.5 to 16.3 cwts.; barley from 17.3 to 19.9 cwts.; bere from 13.7 to 14.1 cwts.; rye from 12.9 to 13.5 cwts.; potatoes from 4.0 to 5.6 tons; turnips from 15.3 to 16.7 tons; mangel wurzel and beet root from 16.6 to 17.6 tons; flax from 29.4 to 37.7 stones.

The rate for hay from clover, sainfoin and grasses under rotation, 2·2 tons, and that for hay from permanent pasture or grass not broken up in rotation, 2·4 tons, are respectively the same as the mean rates for the ten year period.

The total estimated produce of wheat in 1905 was 766,154 cwts., being 37·6 per cent. greater than the produce for the preceding year, and 0·6 per cent. over the average for the ten years 1895-1904; the total quantity of oats was 17,858,311 cwts., being 1·0 per cent. more than the produce in 1904, and 1·4 per cent. below the average for the ten years 1895-1904; the quantity of barley was 3,077,453 cwts., being 31·1 per cent. over the produce in 1904, and 6·9 per cent. over the average for the ten years 1895-1904; here yielded 792 cwts. against 869 cwts. in 1904, and an average of 2,170 cwts. for the ten years 1895-1904; and the produce of rye was 137,235 cwts., being 12·0 per cent. over that for the preceding year, and 6·9 per cent. below the average for the ten years 1895-1904.

The total produce of potatoes was 3,423,039 tons, being 29·7 per cent. more than the yield in 1904, and an increase equivalent to 29·9 per cent. as compared with the average produce for the ten years 1895-1904. The turnip crop was 4,722,478 tons, being 5·5 per cent. less than the produce in 1904, and 3·3 per cent. above the average for the ten years 1895-1904; and the total quantity of mangel wurzel and beet root was 1,281,557 tons, being 3·9 per cent. less than in 1904, and 17·6 per cent. over the average for the ten years 1895-1904.

The yield of flax was 10,872 tons, being 16·4 per cent. over the produce in 1904, and 12·9 per cent. over the average quantity for the ten years 1895-1904.

The produce of hay from clover, sainfoin and grasses under rotation was 1,399,109 tons, showing a decrease equal to 2·9 per cent. as compared with the quantity in 1904, and the quantity of hay from permanent pasture and grass not broken up in rotation was 3,923,481 tons, being 3·0 per cent. under the quantity of such produce in 1904. The aggregate quantity of hay under both headings (5,322,590 tons) is 164,340 tons (or 3·0 per cent.) less than that for 1904, but shows an increase equivalent to 5·7 per cent. as compared with the average produce for the ten years 1895-1904.

TABLE showing the Mean Rates of Produce per Statute Acre of the principal Crops for the 10 years 1895-1904; the Average Rates for 1904 and 1905 respectively; and the Increase or Decrease in the Rate for each crop in 1905 compared with that for 1904, and with the Mean Rate for the 10 years 1895-1904.

In 1880 a Special Return to Parliament was made as to the acreage under each variety of potato, their yield, and their liability to disease at that time. Since that period an annual return has been made of the acreage and yield of each variety of potato in Ireland, which has been published as part of the Agricultural Statistics; that for 1905 will be found in Table V., on pages 38-39. As already stated, the acreage under potatoes in Ireland in 1905 was 616,755, as compared with 618,540 in the year 1904, showing a decrease of 1,785 acres.

The acreage under each of the principal varieties of potatoes planted in 1905, with the percentage to the total, is shown in the following statement:—

	Acrea.	Per Cent.		Acrea.	Per Cent.
Champions,	303,697	58.9	British Queens,	5,375	5.1
Up-to-Date,	77,168	12.5	American Rosen,	2,376	
Beauty of Bute,	39,687	6.4	Bruce,	2,372	
Flounders,	36,817	6.0	Champion Skerries, ..	1,876	
Suttons or Sutton's Abundance,	28,489	4.6	Northern Star,	1,795	
Sherry Blues,	19,570	3.2	Black Skerries,	1,725	
Irish Whites,	18,582	3.0	Elephants or White Elephants,	1,497	
			Early Rosen,	1,369	
			Gawkins,	1,276	
			Main Crop,	1,232	
			All others,	12,632	

The main feature observable in the foregoing statement is that 58.9 per cent. of the acreage under the potato crop in Ireland consists of Champions, leaving only 41.1 per cent. for all other varieties—the percentage of some of these being so small as to be barely appreciable when put into figures.

The "Champion" potato was first introduced in quantity into Ireland in the year 1880, after the failure of the potato crop in 1879. Since that year it has constituted the main potato crop of the country, as shown by the following statement, from which, however, it will also be observed that from 1891 to 1900 the proportion under Champions showed a gradual decline from 79.7 per cent. to 66.1 per cent., but that in 1901 the proportion showed a fractional increase to 66.4 per cent., to fall again, however, in 1902, to 65.5; in 1903, to 63.7, in 1904, to 61.3, and in 1905, to 58.9 per cent., the lowest percentage yet recorded for that variety of potato seed.

TABLE showing for the years 1884-1905 the total area under Potatoes, and the extent under "Champions," with the number of acres under that variety in every 100 acres under Potatoes.

YEARS.	Total Area under Potatoes.	Area under Champions.	Proportion per cent. under Champions.	YEARS.	Total Area under Potatoes.	Area under Champions.	Proportion per cent. under Champions.
	Statute Acres.	Statute Acres.			Statute Acres.	Statute Acres.	
1884.	798,968	637,715	79.8	1895.	719,485	561,035	77.7
1885.	787,292	635,945	79.7	1896.	746,025	529,573	71.0
1886.	759,847	638,283	79.8	1897.	677,316	491,673	72.6
1887.	766,939	694,231	79.9	1898.	664,826	465,731	70.0
1888.	804,566	628,629	78.1	1899.	662,314	451,133	68.0
1889.	787,231	655,661	79.6	1900.	651,679	432,323	66.1
1890.	789,861	611,700	78.6	1901.	635,281	421,860	66.4
1891.	753,232	604,408	79.7	1902.	629,801	412,560	65.6
1892.	746,025	585,966	79.5	1903.	630,303	396,915	63.7
1893.	721,726	675,665	79.1	1904.	613,610	379,268	61.9
1894.	717,090	602,874	78.5	1905.	606,765	363,017	58.9

A reference to Table V., pages 38-39, where the acreage under potatoes is set out for each variety by counties and provinces and for the whole of Ireland, will show that in the counties of Dublin, Wicklow, Antrim, Dougal, Down, Londonderry, and Tyrone, there is less tendency to rely on Champions than in the other counties of Ireland.

The accompanying diagram indicates the very considerable yearly fluctuations in the produce of this staple crop. The average yield per ton per acre of potatoes for the whole of Ireland in each year for the period 1886-1905 is shown in the subjoined tabular statement:—

STATEMENT showing the Average Produce of Potatoes in Tons per Acre for the whole of Ireland in each of the Twenty years, 1886-1905, and also the Mean Produce per Statute Acre for the same period.

Years.	Tons.	Years.	Tons.	Years.	Tons.
1886.	3.5	1893.	4.2	1900.	2.8
1887.	4.5	1894.	3.0	1901.	5.3
1888.	3.1	1895.	4.9	1902.	4.3
1889.	3.0	1896.	3.8	1903.	3.8
1890.	2.3	1897.	2.2	1904.	4.3
1891.	4.0	1898.	4.4	1905.	6.6
1892.	5.5	1899.	4.2	Mean,	3.8

On examination of the figures in the following statement, it will be seen that the estimated average Rates of Produce per acre of the Potato Crop this year varies from 7.2 tons in the Co. Down, to 3.9 tons in Co. Kilkenny, that the rate for the whole country is 1.3 higher than in 1904, and that there has been an increase in each county when compared with last year.

STATEMENT showing for 1905 and 1904 the Produce per Acre, in Tons, of Potatoes for each County and Province and for the whole of Ireland.

BEE-KEEPING.

Bee-keeping Statistics for the Season 1904.

The inquiries made in the preceding eighteen years relative to the extent to which bee-keeping is followed in Ireland, and the degree of success attained in this special branch of rural economy, were repeated this year with reference to the season of 1904, and the results will be found set forth in Table VII. on pages 42-43. In 1890, at the request of the Irish Bee-keepers' Association, the form previously used for collecting information on the subject was varied in some respects, and additional details were obtained.

According to the Returns received, the quantity of honey produced in 1904 was 33·3 per cent. below the average quantity for the preceding ten years. It was also 1·1 per cent. below the quantity for the year 1903, the returns for which showed a decrease of 31·4 per cent. as compared with the quantity in 1902.

The quantity of honey produced, according to the Returns, was 308,866 lbs.; of this 84,157 lbs. were produced in the province of Leinster; 92,071 lbs. in Munster; 84,635 lbs. in Ulster; and 48,003 lbs. in Connaught. Of the 308,866 lbs., 219,433 lbs. were produced "in Hives having Movable Combs," and 89,433 lbs. "in other Hives." It was stated that 114,410 lbs. was "Run Honey," and 194,456 lbs. "Section Honey."

The number of stocks brought through the Winter of 1904-1905, amounted to 22,291; of which 13,294 were in hives

having movable combs, and 8,997 in other hives. See Table VII. on pages 42-43.

According to the Returns collected there were 3,083 lbs. of wax manufactured in 1904; of which 2,066 lbs. were from hives having movable combs, and 1,017 lbs. from other hives.

The Returns received in 1904 gave the quantity of honey produced in 1903 as 359,624 lbs.; the number of stocks brought through the winter of 1903-1904 as 26,474, and the quantity of wax manufactured in 1903 as 3,850 lbs.

The following Table shows the quantity of Honey returned as produced in Ireland during each of the eleven years 1894-1904, with the average annual quantity for the ten years 1894-1903.

TABLE showing for each of the Eleven Years 1894-1904 the Quantity of HONEY Produced in Ireland, distinguishing the Quantity Produced in Hives having Movable Combs from that Produced in other Hives, and RUN HONEY from SECTION HONEY; with the Average Annual Quantity for the Ten Years 1894-1903.

YEARS.	HONEY PRODUCED, IN LBS.						
	In Hives having Movable Combs.			In other Hives.			GENERAL TOTAL.
	Res.	Section.	Total.	Run.	Section.	Total.	
1894,	42,181	87,644	129,825	70,150	34,838	105,018	234,838
1895,	43,715	95,841	139,556	71,314	28,101	99,415	238,971
1896,	45,261	119,186	164,447	81,328	29,921	110,259	274,706
1897,	62,535	165,335	227,870	116,128	38,062	154,190	382,060
1898,	75,307	202,124	277,431	142,910	55,127	198,037	475,468
1899,	106,167	373,895	480,062	198,174	67,456	265,630	745,692
1900,	90,515	312,392	402,907	169,239	51,093	220,332	623,239
1901,	101,630	338,633	440,263	194,655	61,590	256,245	696,508
1902,	82,310	265,478	347,788	130,274	46,074	176,348	524,136
1903,	55,912	197,013	252,925	83,207	23,413	106,620	359,545
Average, 1894 to 1903,	75,875	222,655	298,530	125,745	42,473	168,218	466,748
1904,	45,895	170,531	216,426	61,658	23,875	85,533	301,959

From this Table it will be seen that the quantity produced in 1904 was less than that for any of the years following 1896; it is 14·1 per cent. less than the quantity returned for 1903; and shows a decrease of 33·3 per cent. as compared with the average for the ten years 1894-1903.

I have the honour to be,

SIR,

Your obedient Servant,

W. G. S. ADAMS,

*Superintendent of Statistics and
Intelligence Branch.*

DEPARTMENT OF AGRICULTURE

AND TECHNICAL INSTRUCTION FOR IRELAND,

DUBLIN CASTLE,

22nd February, 1906.

SIR,

I have to acknowledge the receipt of your letter of the 19th instant, forwarding, for submission to His Excellency the Lord Lieutenant, the Tables showing the Extent in Statute Acres and the Produce of the Crops for the year 1905.

I am,

Sir,

Your obedient Servant,

J. B. DOUGHERTY.

THE SECRETARY,

DEPARTMENT OF AGRICULTURE AND

TECHNICAL INSTRUCTION FOR IRELAND.

DIAGRAM Showing AVERAGE PRODUCE of POTATOES in TONS PER STATUTE ACRE for the WHOLE OF IRELAND in each of the Twenty years, 1886-1905, and also the MEAN PRODUCE PER STATUTE ACRE for the same period.
